

AWS AMPLIFY:

SETUP GITHUB REPOSITORY:

CREATE NEW APP:

ADD THE REPOSITORY IN AMPLIFY

The screenshot shows the AWS Amplify console interface for creating a new app. The left sidebar contains a progress indicator with four steps: 'Choose source code provider' (completed), 'Add repository and branch' (active), 'App settings', and 'Review'. The main content area is titled 'Add repository and branch' and features a search bar with the text 'Arshddev/Bert_Sentiment_frontend'. Below the search bar is a message box stating: 'If you don't see your repository in the dropdown above, ensure the Amplify GitHub App has permissions to the repository. If your repository still doesn't appear, push a commit and click the refresh button.' A button labeled 'Update GitHub permissions' is next to this message. Below the message is another search bar with the text 'main'. At the bottom of the main area is a checkbox labeled 'My app is a monorepo'. At the bottom right of the main area are three buttons: 'Cancel', 'Previous', and 'Next'. The footer of the console shows 'CloudShell', 'Feedback', and copyright information for Amazon Web Services, Inc. or its affiliates.

CONFIGURE APP SETTINGS:

The screenshot shows the AWS Amplify console interface for configuring app settings. The left sidebar contains a progress indicator with four steps: 'Choose source code provider' (completed), 'Add repository and branch' (completed), 'App settings' (active), and 'Review'. The main content area is titled 'App settings' and features a form for 'App name' with the text 'Bert_Sentiment_frontend'. Below this is a section for 'Build settings' with a message: 'Your build settings have been detected automatically, please verify your "Frontend build command" and "Build output directory".' Under 'Auto-detected frameworks', there are two input fields: 'Frontend build command' and 'Build output directory' (containing '/'). Below these is a button labeled 'Edit YML file'. At the bottom of the main area is a checkbox labeled 'Password protect my site'. At the bottom right of the main area is a button labeled 'Advanced settings' with a dropdown arrow. The footer of the console shows 'CloudShell', 'Feedback', and copyright information for Amazon Web Services, Inc. or its affiliates.
